April 2023

Institute for Health Metrics and Evaluation (IHME) Global Burden of Disease (GBD) study estimates

About

This dataset is from the [WHO Health Inequality Data Repository](#).

This dataset contains estimates of disease incidence and prevalence produced by the Institute for Health Metrics and Evaluation (IHME) Global Burden of Diseases, Injuries and Risk Factors Study (GBD), disaggregated by sex.

The IHME was founded with the goal of providing an impartial, evidence-based picture of global health trends to inform the work of policymakers, researchers and funders. The objective of the GBD study is to quantify health loss worldwide to help leaders improve health systems and address disparities.

Data source

The data are sourced from the [Global Burden of Disease Study 2019](#) via the [Global Health Data Exchange \(GHDx\)](#) website for disease incidence and prevalence estimates.

Methodology

Estimates are produced by IHME as per the methodologies outlined on [IHME website](#).

Dataset metadata

| | |
|---|----------------|
| Date of first publication | April 2023 |
| Date of updated publication | n/a |
| Expected frequency of update | Annual |
| Date of data extraction | September 2022 |
| Temporal coverage | 2000-2019 |
| Spatial coverage | Global |
| Spatial granularity | National |
| Number of countries | 194 |
| Number of indicators | 193 |
| Number of dimensions of inequality | 1 |

Inequality dimensions

Sex (male and female).
